TiJepa-1: what is measured and what is only bridged
Pretraining video
ComplexEye neutrophils
(CC BY 4.0, Zenodo)
+ Leica reference movies
QC, leakage exclusion
4 temporal strides
TiJepa-1
V-JEPA, ViT-S, bf16
mixed masking:
spatial tubes + FUTURE
(latent forecaster)
frozen features
Part A evaluations
BBBC054 morphology class
S-BIAD2196 tracking
latent forecasting
Part B
single-cell NF-kB dynamics
-> acute endotoxin tolerance
-> RNA and ATAC
Molecular data (no images)
GSE260996 RNA-seq (33) GSE261647 ATAC (18)
Tay NF-kB single-cell traces
GSE46903 macrophage atlas GSE58310 trained/tolerant
GSE212282 + GSE185433 restimulation
measured
bridged, not paired
Part C (hypothesis only)
donor-matched activation anchors
resting + RESTIMULATION scores
no image paired to any sample
measured on the same cells
bridged across studies: hypothesis only
