same cell
same condition
cross-study
no public pairing
Immunophenotype: activation morphology
● BBBC054 morphology
Immunophenotype: M0/M1/M2 polarisation (video)
× Dryad BMDM (not obtained)
Immunophenotype: cell identity
○ autofluorescence identity
Metabolism (NAD(P)H lifetime)
○ NAD(P)H-FLIM lifetime
Metabolism (macrophage M1/M2 FLIM)
× Dryad FLIM (not obtained)
Signalling (NF-κB dynamics)
● NF-κB ligand decoding
Signalling memory (acute tolerance)
○ acute tolerance (4 wells)
Transcriptomics
○ Tay RNA (5 conditions)
Epigenomics
○ Tay ATAC (5 conditions)
Cytokines (restimulation; memory proxies)
× restimulation RNA (no images)
Cross-species memory signature
○ mouse-human overlap
Proteomics (beyond signalling reporters)
× none
Integrated single-cell multi-omics
× none
Spatial omics / tissue imaging
× none
Perturbation screens (Perturb-seq, optical pooled)
× none
Immune repertoire, microbiome, clinical
× none
● the imaging-derived readout predicts the modality beyond the row's reference
○ tested, no gain
– not testable
× no public pairing or data
